WHY IS STA-100 ONE SHOULD-HAVE PRODUCTIVE PAA?

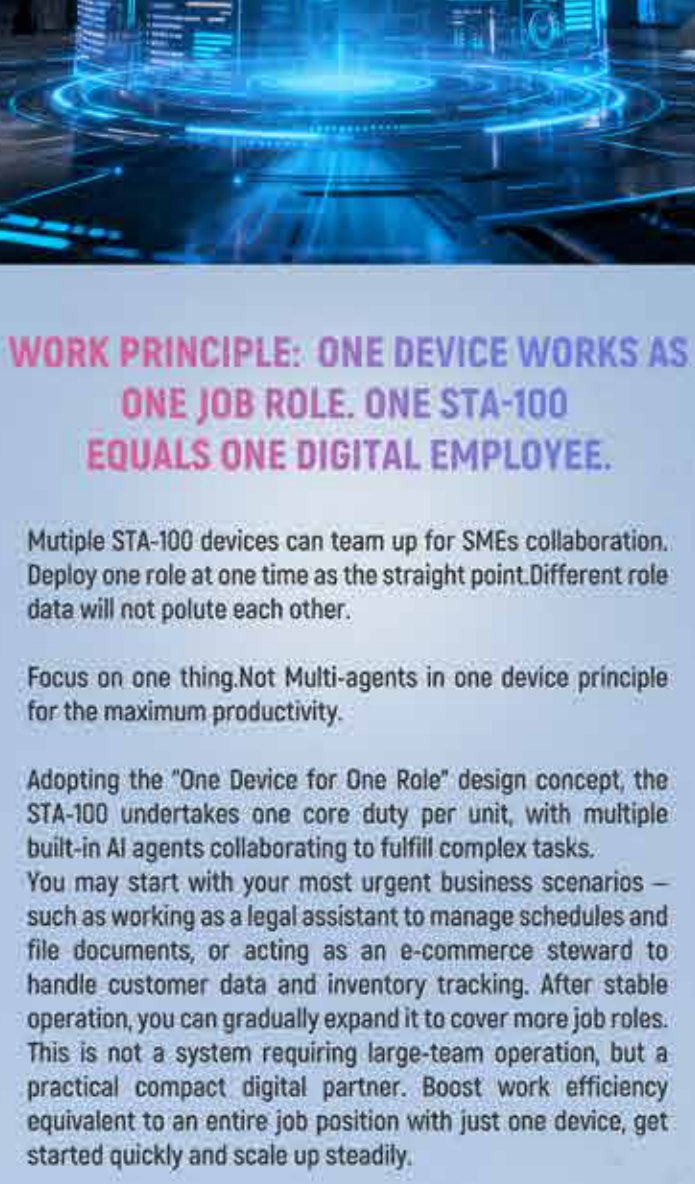

Local Deployment * Data Privacy

The STA-100 adopts a fully local deployment architecture. All data processing is completed inside the device without passing through any public cloud channels. Staff schedules, client documents, contract drafts and sensitive business materials are always stored within your private network. It complies with GDPR, data sovereignty and privacy protection regulations, truly realizing on-site data confinement.

EASY INSTALLATION & QUICK START

Comes with full installation manuals and visual guides. Finish setup from unboxing to operation within 30 minutes. No IT specialists or complicated configurations needed. Pre-installed with OpenClaw, it gets to work immediately after network connection. Designed for non-technical users to lower deployment barriers.

24/7 ALL-TIME GATEWAY ENDURABLE AND STABLE PERFORMANCE.

Always online, ready to assist like a dedicated colleague

Screen-free and maintenance-easy. Simply power it on to get a round-the-clock AI coworker that responds to requests anytime. No need to keep your monitor powered on, nor rely on mobile or PC apps. Accessible from any device at any time, seamlessly integrating AI services into daily workflows.

NATIVE SECURITY & PURE OPERATION

No redundant programs, only your exclusive AI assistant

Built on original OpenClaw core. Free of bundled third-party plugins, forced update prompts and hidden background processes. Fully isolated from core local data devices, it only executes authorized tasks to secure business data privacy and system integrity.

WORK PRINCIPLE: ONE DEVICE WORKS AS ONE JOB ROLE. ONE STA-100 EQUALS ONE DIGITAL EMPLOYEE.

Multiple STA-100 devices can team up for SMEs collaboration. Deploy one role at one time as the straight point.Different role data will not pollute each other.

Focus on one thing.Not Multi-agents in one device principle for the maximum productivity.

Adopting the "One Device for One Role" design concept, the STA-100 undertakes one core duty per unit, with multiple built-in AI agents collaborating to fulfill complex tasks. You may start with your most urgent business scenarios – such as working as a legal assistant to manage schedules and file documents, or acting as an e-commerce steward to handle customer data and inventory tracking. After stable operation, you can gradually expand it to cover more job roles. This is not a system requiring large-team operation, but a practical compact digital partner. Boost work efficiency equivalent to an entire job position with just one device, get started quickly and scale up steadily.

RIGOROUS HARDWARE STANDARDS GUARANTEE RELIABLE PERFORMANCE.

ECOSYSTEM: XFCE GUI OS + OPENCLAW AGENT FRAMEWORK + INTEGRATION/LLM + GLOBAL MAINSTREAM IMS

STA-100 takes use of XFCE GUI OS(Lightweight Linux) and Octa Arm artechture hardware to run OpenClaw smoothly.

EASY TO DEPLOY. READY TO USE.

Dedicated "One-Click Start" for OpenClaw. Just follow our steps! Something great happens. allowing users to launch the agent environment instantly without command-line complexity.

Deploy OpenClaw. One click. Done.

Privacy-first Architecture: Local data processing and SOP storage. Your account credentials and task logs never leave the device.

Hybrid Connectivity: High-speed 5G Wi-Fi for flexibility and wired Ethernet for mission-critical stability.

Edge Intelligence: Operates as a 24/7 "Always-On" gateway. Stable and Endurable Gateway.

24/7 Continuous Operation

STA-100 PAA PRESENTS HUGE PROMISING LIGHTWEIGHT AI MARKETS.

It is positioned as our first. Lightweight Agent PAA. It mainly helps Private Users, SMES with very competitive AI Solutions.

A. PRIVATE PERSONAL AI ASSISTANT.

Automate Repetitive Web-Based Tasks

SaaS Management, Data Entry, Social Media Monitoring with A10Q

1. Automated logging and in-depth sorting of work journals
Scenario: The AI agent automatically aggregates fragmented information to generate well-structured Daily Work Briefs. Leveraging the device's local RAG capability, it compares historical logs and analyzes project progress.
Value: Free up mental energy, accumulate experience dividends, and ensure no critical matters are overlooked.

2.Warm reminders for festivals & interpersonal connections
Scenario: Set reminders for important festivals of key clients and family members. Store past gift records locally and offer thoughtful suggestions.
Value: Maintain high-value social connections.

3.Private financial management monitoring & intelligent early warning
Scenario: Track market fluctuations in real time. Instantly send notifications via private channels once assets hit preset take-profit/stop-loss levels or key research reports are released.
Value: Eliminate the risk of personal asset data leakage from third-party financial apps.

SECURITY NOTE!

However, when you send tasks to OpenClaw, be sure to send it instructions and rules; make sure it works for you only within the scope and time you allow; to avoid any dangerous incidents such as password leaks, deletion of important information, etc.

B. E-COMMERCE COMPANIES / SMALL ONLINE BUSINESS

C. SMALL AND MEDIUM ENTERPRISES (SMES)

Micro-business Owners Solo Entrepreneurs / Super Individuals,Light Startup Team,University entrepreneurs
